Children's Medical Services Network
(CMS Net) - Information Bulletin # 194**

December 2006 Change Cycle

The following is a list of changes which were added to the CMS Net System for the December 2006 Change Cycle:

CMS Net Web (SAR):

Medical Supply Grouping: Changed two codes and two descriptors.
MSG 02 - Changed code to 9928D to 9981F
MSG 03 – Changed code 9930A to 9914N
MSG 03 – Add (2 per pkg) to the end of code 9946As description [will now read "Sterile 2 x 2s –8 ply (2 per pkg)"]
MSG 04 – Add (2 per pkg) to the end of code 9946As description [will now read "Sterile 2 x 2s –8 ply (2 per pkg)"]

Negotiated Price: Due to changes in policies which allow negotiated pricing for procedure codes with the price value of "0", the SAR system will require the following modifications.

- Allow the user enter a negotiated price when the procedure code price on file is "0."
- Allow users with SAR EPSDT-SS, System Administration, and SAR Override the ability to enter negotiated prices on a SAR(s) for procedure codes where the price is "0."
- Only medical procedure codes will allow for negotiated pricing. Users may not enter pricing for dental procedure codes, NDC, medical supply codes, or service code groupings.
- The last digit of a SAR number with negotiated pricing will contain a "3" as an indicator to the FI.
- Procedure codes with negotiated pricing and services without negotiated pricing cannot be on the same SAR.

SCG 11 – Medical Therapy SCG: Removed the validation which prevented a user from selecting the category "Vendored Therapy" when SCG 11 service code is added.

CMS Net Web (PIP):

PIP – Activity report: Created a new activity report which is sorted by client name instead of provider.

CMS Net Legacy:

New validation in Client Eligibility: Users cannot create a CCS Eligibility Start Date prior to the Date of Birth. If this occurs, the error message "The CCS Elig Start Dt cannot precede the Date of Birth" will display.

Updated Aid Code Description: From "9U – No Signed PSA" to "9U HF Elig not completed."

Insurance Carriers: The system will now end date insurance carriers which are not valid or obsolete from the client's insurance record. This process will allow CCS client records to match the Health Insurance Segment in MEDS. A list will be provided to the counties with the clients who had an end date entered in the insurance coverage.

Record user transactions on CMS Net: Allow System Administrators the capability to generate printouts that document user transactions, including the date a case record was changed, user performing the change, and description of field changed. Transaction logs older than one year will be archived and can only be retrieved by requesting it from CMS IT personnel. Create new Transactions Tracking screens to display all transactions or transactions filtered by field values
